## ISSA-UK – Anti-Malware Event

"The Global Threat from across the Seas"

8th July 2010

---

*ISSA Chapter of the Year 2005 and 2006*

## ISSA-UK TECHNOLOGY EVENTS

These sessions offer product and service vendors a unique sales pitch to attendees. Vendors are allocated a 10 minute slot to deliver to present their products or services in a "Dragons Den" style delivery.

Vendors should be prepared to expand on the subject areas and present technical and commercial solutions. A PowerPoint presentation may be used (we need these 48 hours in advance)

The objective is to convey a "short-sharp" product or service offering that ISSA members will remember and will be of use to their respective organisations.

ISSA-UK is seeking to engage no more than 10 companies with anti-malware related products and services

There will be no time for questions and answers at the end of each presentation, however during the afternoon Round Table Sessions, these products and services will be discussed.

ISSA-UK members will nominate awards to the best technology update presentations of the day.

Vendors will also be given table space for the distribution of sales related literature and to follow up on potential sales opportunities.

## LOCATION – HMS PRESIDENT, RIVER THAMES

HMS President (1918) was an Anchusa class corvette of the Royal Navy, completed in 1918. She was originally named HMS Saxifrage and has been permanently moored at Victoria Embankment for over 80 years.

Commissioned as a 'Q' Ship (or Mystery Ship), she was originally part of the flower class built in World War 1 and was known as Saxifrage (The Pride of London).

Saxifrage was built in Renfrew, part of a small class of convoy protection ships built to look like merchant ships for use as Q-ships in World War I. Disguised as a merchant ship, she was designed to attract German U boats that she would then try and destroy with hidden weapons.

HMS President (1918) is listed on the National Register of Historic Vessels and is located between Temple and Blackfriars Underground stations on the River Thames (Victoria Embankment, EC4Y 0HJ).

## ISSA-UK ANTI-MALWARE EVENT - "THE GLOBAL THREAT FROM ACROSS THE SEAS"

The ship will accommodate up to 200 guests, comprising ISSA-UK members, information security industry partners, ISSA-UK Advisory Board members, speakers and Sponsors. We are pleased to announce Rt Hon David Blunkett MP as our keynote speaker.
